EDUCATION

Queen's University <i>Bachelor of Computing Honours, Software Design Specialization with Professional Internship</i> • cGPA: 3.86 • Relevant Coursework: Data Structures, Algorithms, OS, Databases, Software Architecture, Software QA, HCI	Sep 2022 – Apr 2027 Kingston, ON
--	-------------------------------------

EXPERIENCE

Ontario Teachers' Pension Plan (OTPP) <i>Software Engineering Intern</i> • Built an LLM assisted remediation workflow for 1,000+ GitHub Dependabot alerts across internal repositories • Generated sanitized JSON context files feeding the LLM remediation pipeline for vulnerability analysis • Developed a RAG search system with embeddings and ChromaDB to enable semantic retrieval over JSON data • Built a Jenkins CI/CD pipeline automating Docker tagging and registry pushes, reducing deployment steps by 70% • Refactored legacy SOAP integrations into REST endpoints to modernize backend APIs and improve maintainability	May 2025 – Present Toronto, ON
Kaniq <i>AI Systems Developer</i> • Deployed a FastMCP agent server on GCP Cloud Run to expose LLM ranked banking product retrieval tools • Built a Playwright/Python ingestion pipeline normalizing 100+ products across 10+ banks into a unified schema • Engineered MongoDB Atlas upserts, soft deletion, and reconciliation logic to maintain an active product catalog • Designed Gemini 2.5 Pro prompts to structure card rewards, benefits, fees, and eligibility metadata • Added 1,245 pytest cases across providers, persistence, validation, MCP tools, and internal API routes	Mar 2026 – May 2026 Remote
Queen's Computing Student's Association (COMPSA) <i>Backend Developer</i> • Built backend services to automate student club hiring workflows using Node.js , Express.js , and Sequelize ORM • Designed normalized Sequelize models in MySQL to improve data integrity and API reliability • Integrated Calendly and Postmark APIs to automate interview scheduling and email notifications	Aug 2024 – Dec 2024 Kingston, ON
Dunin-Deshpande Queen's Innovation Centre <i>Entrepreneur in Residence</i> • Co-founded Vita Home, a marketplace for senior accessibility equipment to improve home safety and independence • Built an MVP using Next.js , Node.js , and MySQL to support product discovery and marketplace workflows • Conducted research with 100+ seniors and professionals, securing 30+ potential customers and validating demand	May 2024 – Aug 2024 Kingston, ON

PROJECTS / OPEN SOURCE

Coursify.ca <i>Open Source Contributor</i> <i>Next.js, TypeScript, Supabase, Zod, Vitest</i> Live GitHub • Authored 32 PRs and 113 commits to harden and polish a public course planning platform used by Queen's students • Hardened 15 protected Next.js API routes with Supabase auth, Zod validation, and rate limiting • Expanded Vitest coverage across 17 test files for auth, access control, uploads, course APIs, and security routes • Improved course pages, comments, navigation, charts, and mobile layouts using React , TypeScript , and Tailwind CSS	Apr 2026 – May 2026
Scholar Pups <i>FastAPI, Next.js, MongoDB, LangChain</i> Devpost • Contributed to an AI scholarship platform with Chrome feedback, reducing search time by 40% • Implemented a FastAPI/LangChain review workflow returning feedback in ~4 seconds • Developed a Manifest V3 Chrome extension that returns AI feedback directly in-page • Scraped scholarship data with BeautifulSoup , Requests , and Pandas into MongoDB	Aug 2024

TECHNICAL SKILLS

Languages: Java, Python, C, SQL, HTML, CSS, JavaScript, TypeScript, Bash, Haskell AI/LLM: Gemini 2.5, Vertex AI, LangChain, Llama 3.1, Ollama, RAG, embeddings, ChromaDB Backend/Cloud: FastAPI, FastMCP, Flask, Node.js, Express.js, Supabase, Upstash Redis, Docker, Jenkins, GCP Testing/Security: Vitest, Zod, Playwright, Selenium, rate limiting, API validation Databases/ORMs: MongoDB Atlas, MongoDB, MySQL, Sequelize Frontend/Tools: React, Next.js, Tailwind CSS, Radix UI, Recharts, Git, Auth0, AEM Cloud, StencilJS
